Prusiks

Prusiks are 5-6 mm width nylon kernmantle cord, or spectra. We recommend carrying 2 short and one long prusiks for most situations.

- A short prusik loop is "nose to navel" length when tied
- A long prusik "navel to ground" when tied

Slings

You need at least 2 slings:

- "Long sling" is approx 4 metres before tying off
- "Short sling" is approx 3 metres before tying off

We use 16 to 20 mm width tubular tape in our rental stock. This resists abrasion well, especially when anchoring/belaying off alpine rock. If you bring your own slings (especially pre-stitched slings) 12mm tape will suffice. These should be rated to 22KN or better.

Bivouac Bag

The course is hut-based. Bivouac (bivvy) bags are only required if you wish to sleep out, or sleep in a snowcave on your course. **Some sort of emergency shelter is always required**, like a plastic survival bag or "bothy" bag.
